

Dumpster and Trash Chute Solutions

Eliminate Odors & Deep Clean

Powerful, Proprietary Formula

Dumpster Treatment brings 3 levels of attack to quickly and continuously knock down strong odors:

1. Highly effective odor counteractant to immediately neutralize the odor itself
2. Powerful long-lasting mango fragrance keeps dumpsters smelling fresh
3. Probiotic bacteria chosen specifically for their ability to break down organic waste that causes foul odors and attracts pests. Continues to attack soils and eliminate odors long after initial application.

Clinging foam provides extended contact time for maximum cleaning on any trash receptacle. No scrubbing needed!

**3 Dispensers for Large or Small Areas,
Manual or Automatic! See Back!** →

Diverse, Reliable Dispensers

Small Dumpster Manual Application – Hose End Sprayer

Simply thread the sprayer onto the quart bottle, hook it up to a standard water hose, pull the lever back, rotate the dial to the ON position, and start spraying. Automatically provides the correct dilution, so no manual mixing is needed. Also perfect for trash receptacles or garbage chutes.

Multiple Dumpsters Manual Application – Foam Gun

Fill up the 96 oz. reservoir with Probiotic Dumpster Treatment, connect to a standard water hose, and pull the trigger. Produces a clinging foam to hit every area of the dumpster. Trigger can be locked on for continuous use.

Helpful Hint: For either manual application, best to spray after trash is emptied and hit all areas, including the pads underneath where soils tend to hide.

Large Area Automatic Application – Spray Dispenser

Automatically treat dumpsters throughout the day with simple, digital programming. Set the days, time, and duration of application—even a secure password to prevent tampering. Adjustable spray nozzle lets you set the desired spray pattern to cover the dumpster without over spray.

Helpful Hint: Use every 2 hours for 30-second duration during normal business operations.
