

MAINTENANCE TECHNICIAN TRAINING

# ASSESS AND TRAIN TALENT FOR YOUR MULTI-FAMILY HOUSING BUSINESS

The growing skills gap means competition for skilled labor with other industries. You must now hire for attitude and train for aptitude, making streamlining your training program a top business priority. **SkillMill™ is the world's first online, on-demand [multi-family maintenance course catalog](#)** designed to take the stress out of building your workforce talent.

- Accurately assess, track and develop the skills of your green technicians
- Provide consistent, effective training to all skill levels, across your locations
- Cross-train **HVAC, plumbing and electrical** in-house, reducing third-party costs
- Easily integrate into your current LMS, scaling training company-wide

**Train and Retain.** SkillMill's suite of measurement and engagement tools help you accurately reward progress, encourage lasting careers and provide visibility into the return on your investment.

## Maintenance tech skill assessments — the insight you need to lead

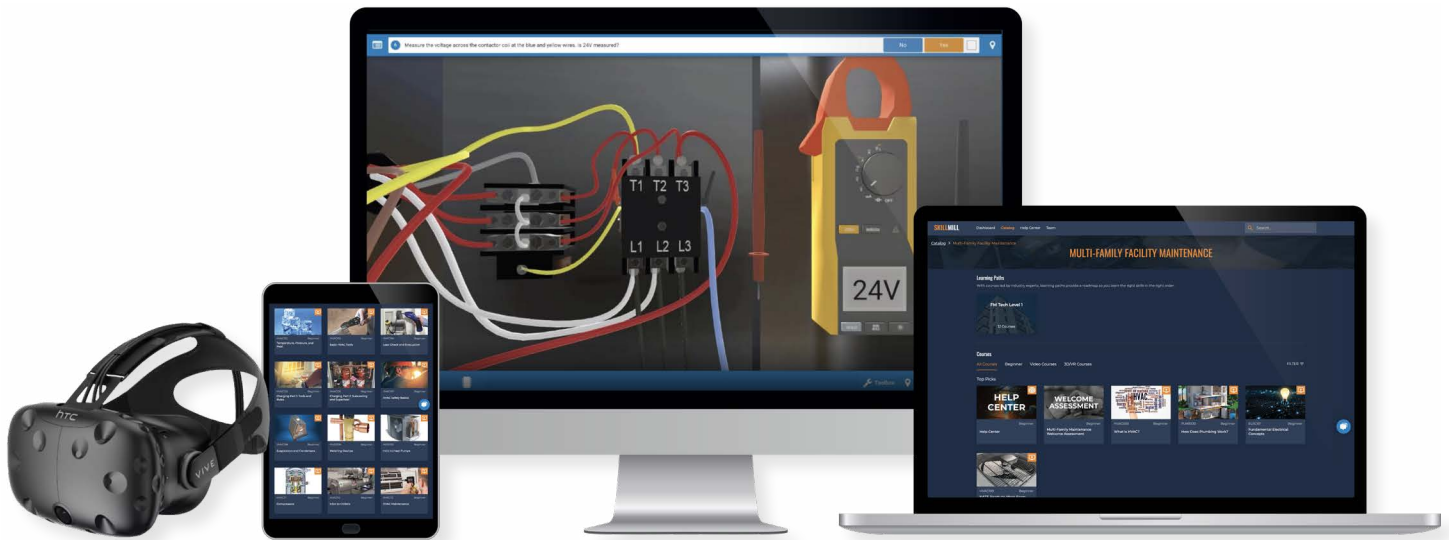

- Take the guesswork out of determining your tech's skill levels with online assessments
- Get a clear snapshot of each worker's strengths and weaknesses before sending them on the job
- Receive targeted course recommendations and learning paths to close skills gaps
- Prevent costly callbacks and poor reviews; send the right people on the right job, the first time

# Take your maintenance career to the **next level.**

## 3D simulations for Multi-Family housing
