

THIRD EYE HEALTH

Simple but powerful technology paired with specially trained physicians.

About Us

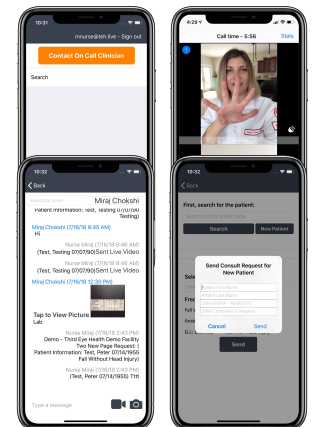

Third Eye Health is the nation's largest post acute telehealth network — empowering long-term care organizations to reduce hospital readmissions and provide higher acuity care.

How it Works

When a resident is in need of immediate medical care, with the touch of a button, the nurse can contact a specially trained physician through secure video and text messaging. This service allows for immediate care and attention to be given to the resident any time, day or night.

“ In 2 minutes, 108 hours a week, using our platform, nurses and staff members have any time access to Third Eye Health physicians expertly trained in post acute emergency medicine. In addition to our physician night and weekend coverage, our nursing team is available 24/7 to coordinate care locally, and eliminate care gaps. ”

— Jane Himmelvo, M.D., Chief Medical Officer

One inappropriate transfer can cost at least \$2000.

What We Offer

- Reduce return-to-hospital rate by providing proactive care and managing residents in place
- Night & weekend telehealth medical care
- 24/7 care coordination with your medical and nursing staff as well as with your health system partners
- Integrates with your electronic health record

Results

- Improve care quality
- Reduce value based purchasing penalties
- Manage higher acuity residents
- Increase hospital referrals based on improved outcomes
- Increase physician and nursing staff retention
- Improve resident and family satisfaction
- Enhance community profitability
